ATRIUS®

Sustainable Solutions

Harness the power of your ESG data with Atrius® to achieve smarter, safer, and greener building operations.

- ✓ Optimize resource usage
- ✓ Engage occupants in shared efforts
- ✓ Centralize and automate data management
- ✓ Report progress to all stakeholders

Spend less time cleaning spreadsheets and more time **designing, implementing, and verifying ESG solutions**.

- ✓ Automated reporting for EnergyStar, CDP, or GRESB

- ✓ Visibility into portfolio energy use and GHG emissions (Scope 1, 2, & 3)

- ✓ Proactive energy management using predictive baseline modeling

- ✓ Interactive and scalable dashboards to use toward LEED points

- ✓ Powerful resource-use visualization features

- ✓ Standard and custom reports and rate structures

- ✓ Capital project tracking using IPMVP Option A, B, & C

AcuityBrands®

ATRIUS®

Essential Sustainability Features

Empowered sustainability teams use Atrius® to leverage resource usage data and accelerate their ESG success.

> "*Weber State has saved over $2.3 million since 2020 using Atrius to identify, scope, and verify energy projects.*"

Justin Owen
Energy Manager
Weber State University

Occupant Engagement

Showcase organization-wide sustainability efforts, resource optimization, and performance metrics through live, interactive displays. Keep stakeholders informed with timely, relevant automated emails and online reports.

Performance Benchmarking

Analyze the most common building or portfolio data points to reveal opportunities to improve performance. Maximize seamless API integration to assess benchmarks set through ENERGY STAR Portfolio Manager.

Streamlined Compliance Reporting

Spend less time managing and building reports and more time strategizing. Track progress and monitor success with real-time and historical data using integrated solutions.

Centralized Data Management

Leverage centralized and normalized data to pinpoint opportunities to positively impact business objectives. Focus on driving sustainability goals instead of managing spreadsheet data. Gain a comprehensive view of your buildings' emission rates, custom rate structures, and U.S. EPA eGRID standard rates.
