# Solutions for Airport Sustainability

Accelerate your airport's sustainability initiatives:

✓ Elevate visibility into energy and resource usage by centralizing disparate data sources

✓ Increase productivity by automating manual processes

✓ Increase stakeholder engagement through visually intuitive dashboards

Achieve a bird's eye view of your airport's **resource consumption** through a single platform.

✓ Automate and streamline reporting for CDP, ACI Airport Carbon Accreditation, and more

✓ Visibility into portfolio energy use and GHG scope 1,2 and 3 emissions

✓ Proactive energy management using predictive baseline modeling

✓ Interactive and scalable dashboards to use toward LEED points

✓ Powerful resource-use visualization features

✓ Standard and custom reports and rate structures

✓ Capital project tracking using IPMVP Option A, B, & C

Atrius®
Sustainability
Features

Nearly 400 airports have already committed to reducing their carbon emissions through the Airport Carbon Accreditation program as part of global efforts to address the impacts of climate change.

Atrius Sustainability is helping airports on their journey to net zero with a cloud based platform to centralize, manage, and report on data critical to achieving sustainability targets.

> " *Flying is **not** the enemy. The enemy is **carbon.** "*

Alexandre de Juniac
Director General and CEO
IATA, International Air
Transport Association

Traveler Engagement

Showcase organization-wide sustainability efforts, resource optimization, and performance metrics through live, interactive displays. Keep stakeholders informed with timely, relevant automated emails and online reports.

Performance Benchmarking

Track the most common portfolio data points such as energy use intensity and utility consumption. Establish baselines that alert you when consumption exceeds established setpoints to track progress.

Streamlined Reporting

Spend less time managing data with automated reports for a complete view of energy usage across concessionaires, airlines, and other airport tenants. Monitor sustainability goal success with real- time and historical data.

Centralized Data Management

Leverage centralized and normalized data to pinpoint opportunities to positively impact business objectives. Focus on driving sustainability goals instead of managing spreadsheet data. Gain a comprehensive view of your portfolio emission rates, utilizing custom and standard rate structures.
